

CommsCentre Business Technologies

Capability Statement: CommsCentre Business Technologies are a Rockhampton based low voltage services contractor operating successfully for (22) years and in that time have built up an enviable reputation in the telecommunications (Molex, Commscope & Siemons), security, Access Control, Audio Visual, MATV & CCTV fields. We understand the issues that surround these types of projects and are proficient in both the materials management and project management developments.

At CommsCentre Business Technologies our aim is to provide quality products and services that will enable our clients to receive the latest technologies and the best outcomes for their individual requirements. We pride ourselves on our honesty and integrity. We strive towards offering the best solutions we can, while maintaining fiscal and logistical boundaries; endeavouring for long standing relationships for now and in the future.

CommsCentre Business Technologies has succeeded through innovative thinking and creative solutions. As one of Central Queensland's most trusted providers of low voltage services, CommsCentre Business Technologies understands that clients vary in their commercial requirements. For some this is increased flexibility while for others the focus may be on cost reduction through productivity and efficiency.

We recognise that what makes a company unique is maintaining a team with the depth of information and history of the industry. At CommsCentre Business Technologies we have specialists in multiple vendor systems along with an R&D team providing tailored solutions for industry's requirements.

Installation & Service personnel

The supply, installation, testing, commissioning of equipment and connecting hardware is carried out by trained and vendor-certified technicians, capable of satisfying the relevant Australian Standard certification requirements.

Professional services

A large part of the success of CommsCentre Business Technologies is our ability to engage with engineers, consultants, CEOs and staff to help guide them through what has become a very complex design process. It is our aim to provide the best solution for client needs over all areas of their low voltage requirements. With this we have not only helped institutions with some outside the box design but built up lasting, trust-based relationships.
